Strong. Durable. Reliable.

STRUXURE® Construction Mats are engineered using our patented Recycled Structural Composite (RSC) formula - making them extremely strong, durable and impervious to rot, fungus, insects, and moisture. STRUXURE® Construction Mats are ideal in wet or harsh-temperature environments and are resistant to abrasion and tread-wear. They are an excellent and cost-effective, long-term solution. STRUXURE® Construction Mats will not gain weight, warp, or lose strength when wet - yielding consistent, reliable performance. Produced from 100% recycled material, STRUXURE® Construction Mats keep plastic waste from ending up in oceans and landfills. Because they do not leach or contain toxic materials, they are an excellent choice for environmentally sensitive areas.

Strong. Durable. Reliable.

STRUXURE® CONSTRUCTION MATS

THE BEST CHOICE FOR A TOUGH JOB.

STRONG

Higher compressive strength values than Oak lumber

DURABLE

Ideal for extremely harsh, wet, outdoor conditions

RELIABLE

Impervious to rot, fungus, insects, and moisture

ENVIRONMENTALLY SAFE AND CLEAN

Will not absorb or release chemicals and contain no toxic materials

'GREEN'

Made from 100% recycled material and 100% recyclable at the end of their long, functional life
